Standard Solution

QS6+ electric cables

QS6+ electric cables are completely waterproof and dustproof thanks to the use of several seals, including additional seals on the pins. A line based on innovative solutions and made of high-strength materials, including high-quality polyamide with the addition of glass fiber. The QS6+ electrical connectors are designed with colored elements for quick identification of the cable function. Thanks to high parameters, QS6+ cables will be irreplaceable for operation in the most difficult weather conditions.

The QS6 coils

The QS6 coils are fully waterproof and dustproof, achieved through the implementation of multiple seals. The QS6 cables are built with the use of extremely durable materials, such as premium polyamide infused with glass fibres. Moreover, the QS6 electrical cables are designed to work reliably even in harsh weather conditions. The QS6 line is made all black.

Duracoil

Duracoil electrical connectors are a classic product line that was created to ensure the best technical parameters. Duracoil cables, sockets and plugs are characterized by a high class of tightness and resistance to mechanical damage and abrasion.

Duracoil +

In an industry dominated by black products, Phillips provides Duracoil + electrical connectors for quick and secure product identification thanks to the colour elements assigned to it. Every product category has its colour coding, which makes it easier for the driver to recognize its function. Duracoil + cables, plugs and sockets are constructed utilizing highly resilient substances and meet all sector-specific requirements.

Standard Solutions

is our basic product line, ensuring high performance and proper functioning of all systems in the truck in accordance with the required standards. The Standard Solutions line is characterized by a classic look and comes in two versions: with plastic or aluminium elements..
