

PHILLIPS

EUROPE

PROFESSIONAL
TRUCK & TRAILER
CONNECTORS

OUR MISSION - MADE TO **CONNECT**

STRATEGIC LOCATION OF THE FACTORY IN THE HEART OF EUROPE

Fast, just-in-time deliveries and easy access to key markets thanks to our location at the crossroads of major transport routes.

COMPREHENSIVE ALL-IN-ONE OFFER

Design, production, warehousing and logistics - everything in one place. We shorten lead times and eliminate unnecessary costs.

MODERN MACHINERY PARK AND IN-HOUSE TOOL SHOP

Full process control, production flexibility and competitive costs.

QUALITY ASSURANCE - IATF 16949, ISO 9001, ISO 14001

We operate in line with international quality standards for the automotive, OE, home appliance and aftermarket industries.

OWN R&D CENTER AND CUSTOMER TAILORED APPROACH

We create solutions adapted to individual needs, providing quick response and support from a dedicated account manager.

MEMBERSHIP IN SDCM AND CLEPA

As an active member of leading industry organizations, we have access to the latest trends and standards of the European market.

DRIVEN BY PASSION SINCE 1928

We are a manufacturer of electrical and pneumatic connectors, combining generations of experience with modern innovation. We proudly continue a tradition that began in 1928 in the United States.

SUSTAINABLE PRODUCTION AND EUROPEAN SUPPLY CHAIN

We focus on responsible production and components sourced from trusted European suppliers.

TOGETHER FOR SUCCESS

People are the foundation of our company - their commitment and professionalism ensure high product quality and a strong brand position.

ELECTRICAL CONNECTORS

QS6+

RELIABILITY IN ALL CONDITIONS

A product for users who expect absolute certainty of performance and durability regardless of circumstances.

- Abrasion-resistant cable jacket, ensuring reliable operation from -40°C to $+125^{\circ}\text{C}$
- ADR certificate – compliant with dangerous goods transport standards
- 3-year warranty
- IP69+: maximum protection against moisture and dust, achieved through multiple seals, including additional pin seals
- Color-coded markings for accurate product identification

DURACOIL+

HIGH QUALITY, PRACTICAL SOLUTIONS

A product for those who need solid and intuitive solutions for everyday use.

- Abrasion-resistant cable jacket, ensuring reliable operation from -40°C to $+105^{\circ}\text{C}$
- IP69: protection against moisture and dust
- 2-year warranty
- Color-coded markings for accurate product identification

4TECH+

DURABILITY AND FUNCTIONALITY IN BASIC FORM

A solution for those who value reliability at an affordable price.

- Abrasion-resistant cable jacket, ensuring reliable operation from -40°C to $+85^{\circ}\text{C}$
- IP54: protection against moisture and dust
- 2-year warranty
- Black product line

PNEUMATIC COUPLINGS

OUR OFFER INCLUDES:

Durable and universal couplings, available in various diameters and lengths, made from robust polyamide or flexible polyurethane

Additional plastic brackets enabling quick and convenient installation and handling

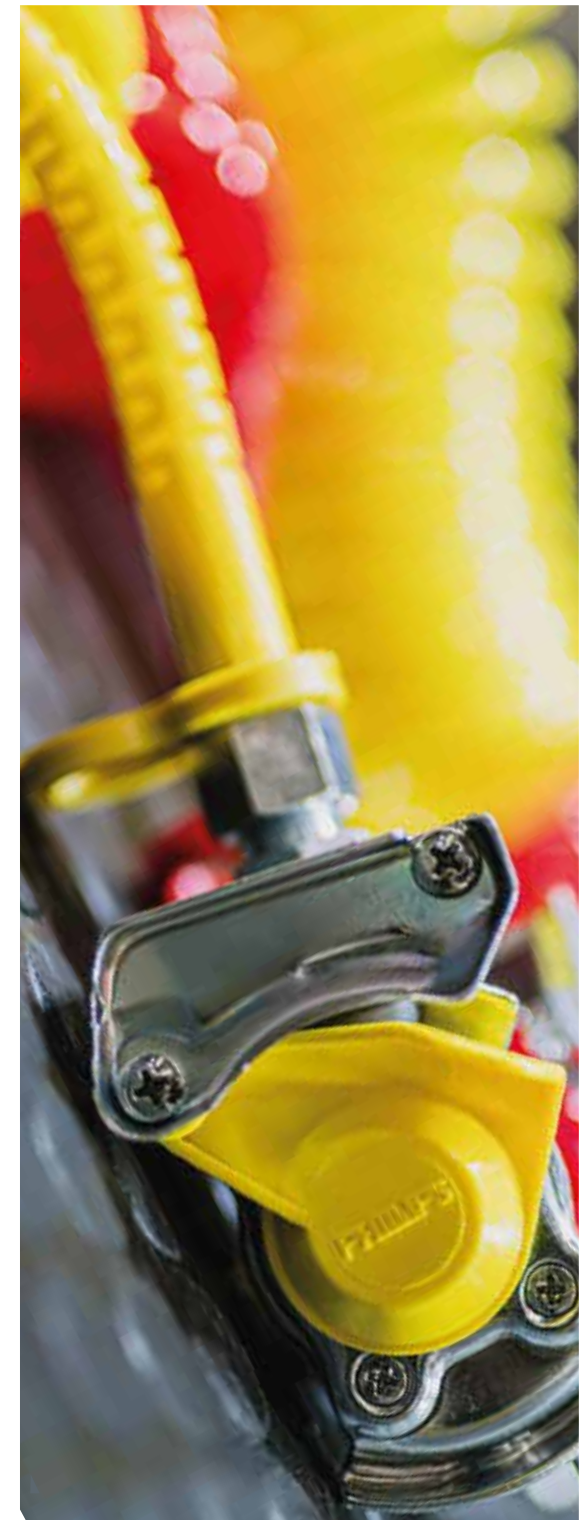

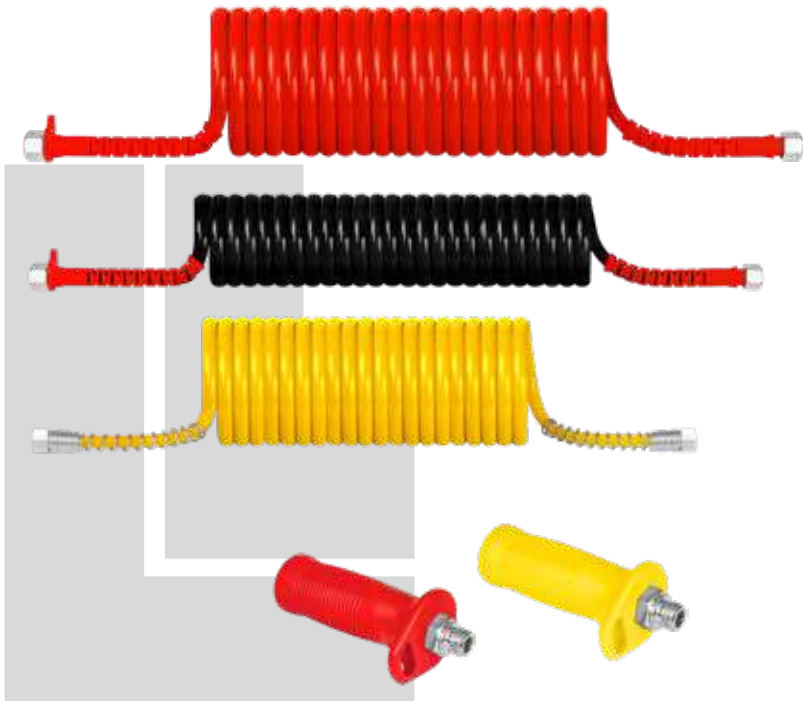

Reducers available in three sizes: M16x1.5, M18x1.5, M22x1.5

Full range of coupling heads - both conventional and automatic

Straight tubes – low-pressure pneumatic lines combining lightness, flexibility and resistance to working conditions

Pneumatic coupling sets with factory-mounted coupling heads, also available in Twin Air Connect versions combining two couplings in a single head

Our products are used in truck manufacturing and are applied both in the OE and aftermarket sectors.

EC15

TECHNOLOGY THAT CONNECTS TODAY WITH THE FUTURE OF COMMUNICATION

Heavy-duty transport is undergoing a revolution - traditional electrical systems are giving way to Ethernet architectures. The EC15 connector from Phillips Europe is the answer to the growing demands of telematics, ADAS and Smart Trailer.

- Data transmission up to 2 Gb/s (+ two redundant channels) - guaranteed communication reliability
- Scalability up to 40 Gb/s - fully ready for future 10GBASE-T1 standards
- Backwards compatibility with the classic 15-pin connector
- Dedicated Ethernet pins - stable and secure connection
- Supports advanced systems: radar, LiDAR, 360° camera - ready for tomorrow's technology

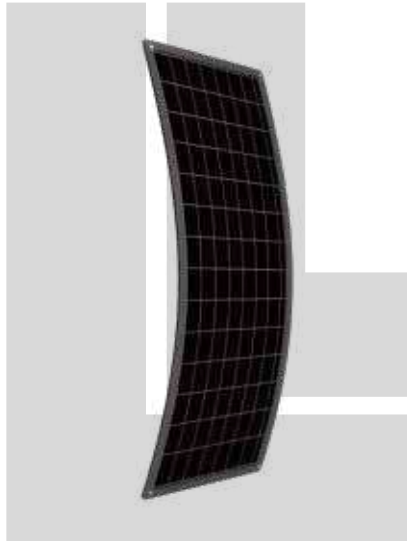

SOLAR PANELS

ENERGY THAT WORKS FOR YOUR FLEET

Modern transport is not just about engine power, but also about smart energy management. Phillips Europe solar panels, mounted on trailer roofs, power cooling systems and liftgates, reducing fuel consumption, cutting CO₂ emissions and extending battery life.

- Ultralight and flexible modules - resistant to vibration and harsh weather conditions
- Effective recharging of reefer and liftgate batteries - greater fleet efficiency
- MPPT controller - automatic charging adjustment to sunlight conditions
- Full resistance to salt, ammonia and UV - reliable in heavy-duty transport
- Quick installation - saving time and simplifying setup
- Available power ratings: 40 Wp, 125 Wp, 260 Wp, 410 Wp

4IN1

ORDER, DURABILITY AND SAFETY IN ONE MODULE

The Phillips Europe 4in1 system combines four separate lines - 15-pin, EBS and two pneumatic lines - into a single integrated set. This ensures a more organized, durable installation resistant to demanding road conditions.

- Organized cable layout - no risk of tangling
- Full compatibility with existing tractor and trailer sockets
- Resistance to stretching, twisting and extreme temperatures - longer service life
- Easy installation and handling - greater reliability

PHILLIPS EUROPE – PLASTIC DIVISION

For over 20 years we have specialized in the design, manufacturing and development of precision plastic components for customers in the automotive, aftermarket, home appliance, OE and industrial sectors

We work in line with Lean Management standards

Our plant operates in accordance with certified quality and environmental management systems: IATF 16949:2016, ISO 9001:2015 and ISO 14001:2015

We provide maintenance, repair and modification services for injection molds

We have a modern machinery park, including 22 injection molding machines - both conventional and vertical - with clamping forces from 25 to 650 tons.

We carry out “turn-key” projects - from idea to stable serial production

We work with passion, precision and responsibility. We respond flexibly to production needs, guaranteeing repeatability and on-time deliveries. We believe that long-term success is built on reliable products and a partnership approach to cooperation.
